Creating a project teams on GitHub

Once you are added out GitHub org, go to Teams tab on Mentorchains

mentorchains

Q Type to search

Overview Repositories 56 Projects 1 Packages Teams 33 People 246 Settings

Seamless communication with teams

Teams are a great way for groups of people to communicate and work on code together. Take a look at why they're great.

Flexible repository access

You can add repositories to your teams with more flexible levels of access (Admin, Write, Read).

Request to join teams

Members can quickly request to join any team. An owner or team maintainer can approve the request.

Team mentions

Use team @mentions (ex. @github/design for the entire team) in any comment, issue, or pull request.

Q Find a team...

1 New team

2 – Provide team name in this format and a one-line description

3 – Select parent team. Parent teams are for the batch and year. It can include multiple pathways.

As a lead always create a project team under a batch parent team.

Reach out to mentor if no parent team is available yet for your batch.

4 – As a lead, create team and add your team members to it.

Create new team

2 **Team name**
Ex. BI_ML_KnowledgeGraph
Mention this team in conversations as @mentorchains/ex-bi_ml_knowledgegraph.

Description
Information on Pathway, batch year, month, and project title
What is this team all about?

3 **Parent team**
July-2024-Batch

Team visibility
 Visible Recommended
A visible team can be seen and [@mentioned](#) by every member of this organization.
 Secret
A secret team can only be seen by its members and may not be nested.

Team notifications
 Enabled
Everyone will be notified when the team is @mentioned.
 Disabled
No one will receive notifications.

4 **Create team**
